The City Lost and Found: Capturing New York, Chicago, and Los Angeles, 1960–1980
Exhibit opens Saturday, February 21.
American cities underwent seismic transformations in the 1960s and 1970s, from shifting demographics and political protests to reshaping through highways and urban renewal. Amid this climate of upheaval, photographers, architects, activists, performance artists, and filmmakers turned conditions of crisis into sites for civic discourse and artistic expression. A collaboration between the Art Institute of Chicago and the Princeton University Art Museum, The City Lost and Found explores photographic and cinematic responses to the changing fabric of New York, Chicago, and Los Angeles that contributed to a reconsideration of cities in popular media and urban policy during this period. This exhibition and publication raise timely questions about the role of art within the social, political, and physical landscape of cities.

Suits, Soldiers, and Hippies
On the local scale, this exhibition provides insight into the reaction of the Princeton University community. Photographs and letters among other documents highlight campus events such as the SDS occupation of the IDA, the Princeton Strike, and the 1970 commencement ceremony, and reveal how the war sparked unrest but also fostered collaboration between the administration and the student body that induced change at both the institutional and national level.
