Coral Princess

Explore an idyllic world of tropical islands, spectacular coral reefs and abundant marine life while cruising aboard the Coral Princess. This intimate expedition cruiser is acclaimed for its exceptional crew and Australian hospitality.

Impeccably crafted and designed specifically to navigate these waters, this expedition cruiser is perfect for exploring the wonders of the Great Barrier Reef and is able to call at remote coral reefs inaccessible to larger ships.

The Coral Princess features an expert onboard naturalist who will provide insight into the Great Barrier Reef’s amazing array of marine life during excursions and lectures. The expedition cruiser is also equipped with a special glass-bottom boat for viewing the aquatic environment.

Guests are accommodated in only 25 tastefully appointed outside cabins featuring private bathroom facilities and individual climate control. Cabins offer two twin beds or one double bed.

Meals are served daily in single, unassigned seatings in the dining room, where skilled chefs specialize in Australian cuisine prepared with local ingredients, including fresh seafood. Complimentary coffee and tea are available around the clock.

There are two lounges, a fully stocked bar, boutique and reference library. Recreational facilities include a sun deck, spa pool and comprehensive dive shop that provides an array of swimming, snorkeling and diving accessories and equipment.
The Wonders of the Great Barrier Reef

The azure tropical waters of the Coral Sea surrounding the legendary Great Barrier Reef is a natural wonder like no other, comprising more than 3,000 individual reefs and 900 islands that span more than 1,400 miles in length. A virtual pageant of marine life, it encompasses tens of thousands of species of fish, coral, reptiles, plants and mammals, ranging from playful dolphins, multi-colored clownfish and giant green turtles to fluorescent coral, pink-striped rainbow fish and the lumbering dugongs affectionately known as sea cows. In the waters surrounding a single reef, as many as 250 species of shrimp can survive and thrive.

Revered for millennia by local Aborigines who depended on it for their livelihood, later “discovered” by the great explorer Captain James Cook in 1770, the Great Barrier Reef has been designated a UNESCO World Heritage site and enjoys strict environmental protections as an Australian National Marine Park.

The program offers the opportunity to experience this breathtaking tropical sea exhibition in a manner no visit to an aquarium can replicate. While snorkeling or cruising in the Coral Princess' glass-bottom boat, you will peer into this magical universe under the waves, where schools of tropical fish swim by in clouds of color, and intricate mosaics reflect a diversity of life rivaled only by the great rainforests of South America. By virtue of its smaller size and special design, the Coral Princess can moor off remote reefs, ensuring that the waters will not be overpopulated by other visitors and the ecosystem remains intact as nature intended. Throughout the cruise, the expedition cruiser's personable marine biologist will give interactive presentations and special lectures and will accompany you on all glass-bottom boat excursions and nature walks.
