New Zealand by Sea
Milford Sound to Auckland aboard the Caledonian Sky
Dear Princetonian

According to Maori legend, New Zealand was fished from the sea by the clever Polynesian demigod, Maui. The North Island is known as Maui’s fish and the South Island, Maui’s canoe. Join your fellow Princetonians in discovering both—fittingly by sea—over the New Year holiday.

Cruise from the South Island’s stunning Milford Sound to cosmopolitan Auckland on the North Island aboard the *Caledonian Sky*, an ideal vessel for exploring New Zealand’s islands, fiords, and craggy coastline. Enjoy a front-row seat to observe the natural beauty for which New Zealand is known and learn, first-hand, about the cultural elements that are nearly as varied and as rich as the natural ones.

Princeton travelers will be joined on this Journey by travelers from Harvard, MIT, and Smith. Throughout the program local guides will share the stage with experts on various topics. Princetonian Lawrence Buell ’61, a professor at Harvard, is an expert in comparative environmental cultures who has been researching New Zealand’s literature and history of environmental protection. His commentary will complement that of MIT Professor Ronald Prinn, who will discuss aspects of climate change both in the U.S. and in New Zealand, his native country, and Smith Professor John Brady, a geologist who considers New Zealand’s volcanoes, glaciers, and active faults an ideal classroom for learning about the earth.

As New Zealand often sits atop people’s lists of “must see” destinations—and for good reason—we anticipate the interest for this program to be high. Contact the Princeton Journeys team at (609) 258-8686 or journeys@princeton.edu today to reserve your space.

With kindest regards,

Explore New Zealand’s magnificent natural beauty—epitomized by Milford Sound (cover) and sky-high geysers (below); spectacular wildlife, including large and raucous royal albatrosses (pictured here); and fascinating Maori culture, whose traditional and distinctive tattoo art form, or *moko*, has experienced a recent resurgence as a sign of cultural identity and pride.
Study Leaders

Ronald Prinn is the TEPCO Professor of Atmospheric Science, Director of the MIT Center for Global Change Science, and Co-Director of the MIT Joint Program on Science and Policy of Global Change. He has been teaching and doing research at MIT for 42 years, having joined the faculty immediately after completing his ScD in MIT's Department of Chemistry in 1971. His current research focuses on the chemistry, physics, and dynamics of the climate system and the linkages between economics, technology, policy, climate processes, and ecosystems that drive global change.

Lawrence Buell, ’61, Powell M. Cabot Research Professor of American Literature at Harvard, has taught the literatures and cultural history of the English-speaking world for more than half a century, and has been at Harvard since 1990. His current research on comparative environmental cultures of the Anglophone world has immersed him in the study of New Zealand's literature, its history of environmental protection, and its dual heritages as a member of the British Commonwealth and as a bicultural Polynesian nation. He received his AB from Princeton and his PhD from Cornell, both in English.

John Brady, Mary Elizabeth Moses Professor of Geosciences at Smith College, has taught geology at Smith since 1975 following graduate work at Harvard. His research interests range from the evolution of metamorphic rocks in Montana and Greece to atomic diffusion measurements—"cooking rocks"—in the experimental petrology lab. He has co-organized National Science Foundation–funded workshops about teaching mineralogy and petrology, and considers New Zealand's volcanoes, glaciers, and active faults an ideal classroom for learning about the earth.

The newest jewel in the national park system, Raikura (“Land of Glowing Skies”) is an ornithologist’s delight. **What to Expect**

You will experience varying weather conditions during this trip, with temperatures ranging from the low 50s to the mid 70s Fahrenheit. Rough seas are always a possibility, and intermittent rain showers are common year-round. The pace of this program is moderately active, with up to two miles of walking over uneven terrain where stairs are unavailable or do not have handrails. Participants will need to climb into and out of Zodias for some shore excursions (staff and crew members will be on hand to assist). Participants must be in good health and able to keep up with the group without assistance from tour staff.

**Airfare**

U.S. domestic and international airfare is not included in the program cost. Round-trip, economy-class airfare from New York to Queenstown, with return from Auckland, is approximately $2,500 per person as of December 2013 and is subject to change without notice. In order to give you as much flexibility as possible with the variety of air travel options available, you are free to make your own air arrangements for this program.

**Fuel Costs**

In today’s oil market, it is difficult to predict fuel costs. Program rates are based upon the prevailing fuel rates at the time of brochure printing. While Criterion Travel will do everything possible to maintain the program rates, if fuel costs increase significantly, it may be necessary to institute a fuel surcharge. In that case, Criterion Travel will notify participants in advance of departure.
