Located at the crossroads of the northern and southern routes of the ancient Silk Road on the edge of the Taklamakan desert in western China, Dunhuang is one of the richest Buddhist sites in China. With nearly 500 cave temples constructed between the fourth and the fourteenth century, the caves of literally thousands of Buddhas represent nearly every aspect of Buddhism, both doctrinally and artistically, through sculptures, murals, portable paintings, and manuscripts found in the caves. Explore this remarkable site both through an exhibition of black-and-white photographs of unusual artistic and historical value taken in the 1940s and through a presentation of its art, architecture, and place along the Silk Road.
